RESEARCH INTERESTS

I am interested in galaxy evolution and AGN feedback at high-redshift ($z > 1$). I study star formation, AGN processes, and their impact on interstellar medium to circumgalactic medium and stars of high- z galaxies using data from various observatories.

SKILLS

Expert in the analysis of data from multi-wavelength IFU instruments on both ground-based and space telescopes, e.g., JWST NIRSpec & MIRI IFU, ALMA, and VLT/MUSE.
